

**ELECTRICAL POWER REQUEST / RIDER FOR “Flashback Band”**

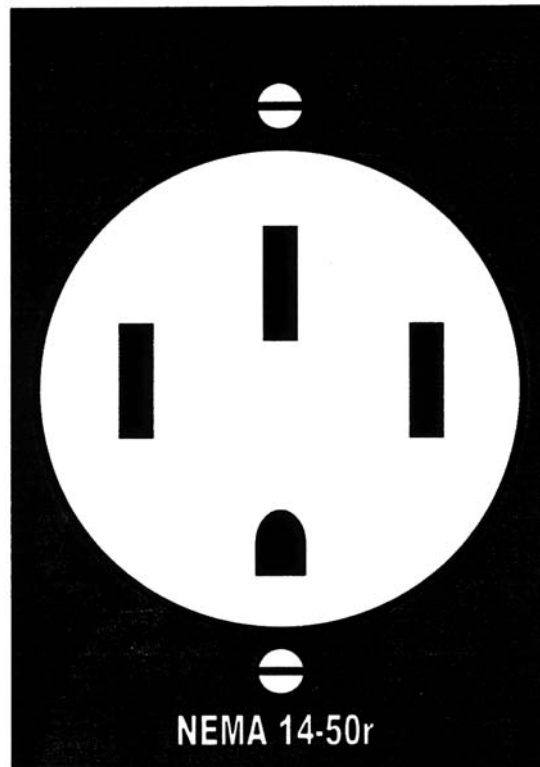

**To Insure An Uninterrupted Performance** due to power loss, you need to provide a 220 volt, 50 amp, female range receptacle, grounded. You may think that 220 volt power is not available in your building or place of event, but, almost without exception, all buildings have 220 volt power available. For example, 220 volt power is commonly found in kitchens. All that we require is the proper electrical connection as shown below.

**DETAILED SPECIFICATION OF ELECTRICAL POWER NEEDED:**

50 Amp, Single Phase, 125/250 Volt, 3 – Pole, 4 – Wire, Grounded (**NEMA 14-50r receptacle**)

Electrical service shall meet or exceed current electrical codes. This would include, but not limited to, the “wire gauge” (wire size). Wire gauge for a 50 amp service is a minimum of #6 gauge copper wire.

**Please Provide the NEMA 14-50r receptacle within 100’ of the band stage**  
**(shown full size)**

We ask that you make every possible effort to provide the required 220 volt power in order to insure an **Uninterrupted Performance**, and eliminate the risk of possible damage to our equipment.

**Flashback Band** will not be responsible for the cost to provide this electrical requirement at your event. If **Flashback** can be of any assistance, please call:

Coleman Lyttle, owner, at: 804-739-1109 (home), or 804-641-9781 (cell)

**Thank You For Your Cooperation**
